

AI-Powered Interview Preparation Coach

Problem Statement

The Challenge

Candidates preparing for interviews often struggle to get realistic, tailored practice and honest feedback. Generic question banks ignore their actual resume and the specific job they are applying for, and there is rarely anyone available on demand to critique the structure, relevance, and pacing of a practice answer.

The Objective

Build an AI-powered Interview Preparation Coach that gives candidates realistic, tailored mock interviews and instant feedback so they can practice and improve before the real thing.

Core Features

- Tailored Question Generation from resume, job description, and optional company.
- Adjustable interview types: Behavioral, Technical, and HR.
- Beginner, Intermediate, and Advanced difficulty levels.
- Typed Answer Practice.
- Instant structured feedback (relevance, STAR, filler words, pacing).
- Resume Parser for PDF resumes.
- Skill-Gap Roadmap Builder.
- Skill Roadmap Dashboard with matched skills, gap skills, study topics, and interview-ready timeline.

Expected Outcome

The platform delivers personalized interview preparation using AI, helping candidates improve confidence, identify skill gaps, and prepare effectively for real interviews.
